You are probably aware from other communications that two ACC students have chosen Bastrop Area Cruisers for a school project in their program to produce a promotional video of our organization. Some weeks ago, John Huish organized visits to several club member's garages to take video and photos and interview members to gather information and material for the video project.

Then on February 22nd, members were asked to meet in Mayfair Park, the park behind the American Legion Hall, so the students could take more video and photos of as many club cars as possible while at the park and while driving on the open road. They set up to do this on Highway 21, and the 25 or so club cars cruised past them toward Paige.

Of course, after that long drive to Paige we needed to stop for lunch, so those that were able to stay stopped at the Roadhouse in Paige. It was a fun little low pressure, short distance cruise and gathering for a Saturday morning. The final video is not quite ready for distribution but various pictures of this gathering are available if you're interested on Google Photo link below. As always, if you have other photos from this event and want to share them, you can upload them to our Google Photo account or forward them to me for upload.

Jeff
