

SHOUT OUT: Blumes' Garage Tour and Car Care Clinic

About 30 BAC members and guests had a great time June 1st at the Blumes' garage for a great garage tour, a great breakfast spread, a extensive demo of car polishing/waxing techniques, and general member comraderie.

Greg and Susie's impeccably maintained garage always looks like it was just constructed yesterday, and features Greg's woodworking shop, their stunning '67 427 Chevelle, and various others tools and toys. Susie prepared some great breakfast items including a cinammon crumb cake, an egg casserole, and the hard-to-beat smoked bacon.

The feature activity of the morning was a detailed (sorry, pun alert) demo of techniques and products that Greg uses to treat car paint finish to bring a weathered car finish back to life or to just refresh a well maintained car exterior to an even more stunning level. In this case, it was more like the latter situation where Greg demonstrated deep cleaning, polishing, and waxing techniques on Bo's C5 Corvette.

Two handouts are attached, describing the procedures used and the products used in the demo.

Pictures should be accessable with the Google Photos link below. If they are not, let me know. No guarantee I can fix the problem, but at least it will make me feel humble.

Thanks to Greg and Susie for a very enjoyable morning.

Jeff
